Re: Regional Flood Elevation for Sand Lake  
Section 2, T33N R18W, Osceola Township

Dear Mr. *Spanel*:

On May 13, 1991 you requested assistance in conjunction with a request for a Land Use Permit submitted by William Gregg to add onto his existing cabin. Since the project cost is less than \$125,000 and project area is less than 5 acres, we have conducted the engineering analysis to determine the Regional Flood Elevation (RFE) for Sand Lake. We have determined the Regional Flood Elevation to be 1124 MSL.

If you have any questions regarding the analysis, please contact me at (608) 266-2709.

Sincerely,

A handwritten signature in black ink, appearing to read "Alan R. Lulloff".

Alan R. Lulloff, P.E.
