Uses within the shorelands shall conform to requirements of those respective districts and in addition, each use and property shall be subject to the requirements of this Ordinance.

10.5.3 GREATER RESTRICTIONS

The provisions of the shorelands and wetlands regulations supersede all the provisions of any county zoning ordinance adopted under Chapter 59, Wisconsin Statutes, which relate to shorelands. However, where an ordinance adopted under a statute other than Chapter 59, Wisconsin Statutes, applies and is more restrictive than this Ordinance, the more restrictive provision of said ordinance shall continue in full force and effect only to the extent of the greater restrictions that are applicable, but not otherwise. In addition:

- A) The provisions of this section of the ordinance (Section 10.5), which relates to shorelands and wetlands regulations, shall not require approval or be subject to disapproval by any town or town board.
- B) If an existing town ordinance relating to shorelands is more restrictive than this Ordinance or any amendments thereto, the town ordinance continues in all respects to the extent of the greater restrictions, but not otherwise.
- C) The shorelands regulations are not intended to repeal, abrogate, or impair any existing deed restrictions, covenants, or easements. However, where this section of the ordinance imposes greater restrictions, the provisions of this section of the ordinance shall prevail.

10.5.4 DEFINITIONS

For the purpose of this section of the ordinance certain words and terms are defined as follows. Words used in the present tense include the future; the singular number includes the plural number and words in the plural number include the singular number; the word "shall" is mandatory and not discretionary. For all other definitions, see Article 10.2 Definitions.

"STRUCTURE" means a principal structure or any accessory structure including a garage, shed, boathouse, sidewalk, stairway, walkway, patio, deck, retaining wall, porch, or fire pit.

10.5.5 SHORELAND-WETLAND DISTRICT

- FEMA Floodplain Maps (*Federal Emergency Management Agency*)

Designation – The Shoreland-Wetland district includes all shorelands subject to regulation under Section 10.5.2, which are designated as wetlands on the wetlands maps that have been adopted and made a part of this ordinance in the paragraph above.

Locating shoreland-wetlands boundaries. Where an apparent discrepancy exists between the Shoreland-Wetland District shown on the official wetlands maps and actual field conditions at the time the maps were adopted, the Zoning Administrator shall contact the appropriate field office of the Department of Natural Resources to determine if the shoreland-wetland district, as mapped, is in error. If the Department of Natural Resources staff concurs with the Zoning Administrator that a particular area was incorrectly mapped as a wetlands, the Zoning Administrator shall have the

authority to immediately grant or deny a land use permit in accordance with the regulations applicable to the correct zoning district.

In order to correct wetland-mapping errors shown on the official map, the Zoning Administrator shall complete a map amendment in a timely manner.

B) PROHIBITED USES IN SHORELAND–WETLAND ZONING DISTRICTS.

Any use not permitted in allowable and permitted uses is prohibited in a shoreland–wetland zoning district unless the wetland or portion thereof is rezoned by amendment of the county zoning ordinance in accordance with s. 59.69(5)(e), Stats., and the procedures outlined in NR 115.04.

C) WETLAND SETBACKS

All buildings and structures except for those permitted to be within wetland areas shall be setback at least 25 feet from the boundary of mapped wetlands.

10.5.6 CLASSIFICATION AND RECLASSIFICATION OF SURFACE WATERS

The standards of the Shoreland Overlay District shall be in addition to any other requirements set forth in this ordinance, including underlying zoning districts. When the language in another section of this ordinance conflicts with another, the more restrictive language applies.

A) CLASSIFICATION OF WATERS

Navigable waters in Polk County are classified according to criteria established in the Polk County Lakes Classification System, which was adopted by the Polk County Board of Supervisors on April 20, 1999 and is hereby incorporated herein and made part of this ordinance in Appendix B.

Polk County waters are classified into three (3) classes.

Class 1 waters are those that are least vulnerable; Class 2 waters are those that are moderately vulnerable; and Class 3 waters are those that are most vulnerable and includes all rivers and streams, all lakes that are twenty (20) acres or less in size, and all unnamed lakes not appearing on the DNR publication entitled: *Surface Water Resources of Polk County*. The Zoning Administrator shall make available a copy upon demand.

Any named lake inadvertently omitted from the DNR's *Surface Water Resources of Polk County* will be classified according to available information or Class 3 until information is available.

B) RECLASSIFICATION OF WATERS

Waters may be reclassified by amendment of the Polk County Waters Lakes Classification System under Appendix A of this ordinance. A petitioner for reclassification shall provide evidence related to each of the criteria described below and identify the waterway or specific portion of a waterway, which is the subject of the request. To avoid fragmentation of watersheds by numerous management strategies and to preserve administrative efficiency, a contiguous portion of a waterway, which is less than 0.5 mile in length, may not be reclassified. The following criteria shall be the sole basis for the County Board decision on the petition: The criteria specified in the Polk County Waters Classification System.

b. Boathouses are prohibited on Class 2 lakes, Class 3 lakes, and rivers except:

- 1. Where a Class 2 lake has an organized association, or more than 50% of the total lakeshore is developed consistent with the ordinance by lake class, may request by petition to the Governing Committee to have the construction of boathouses allowed on their lake.

G) NON-CONFORMING STRUCTURES AND USES

- 1) Nonconforming Structures
 - a. Allowed- The following activities are allowed and do not need a land use permit, however, may require other permits
 1. A nonconforming structure is allowed maintenance, repair, replacement, restoration, rebuilding or remodeling of all or any part of a nonconforming structure if the activity does not expand the footprint of the nonconforming structure.
 2. A nonconforming structure is allowed vertical expansion up to 35ft in height

- b. Permitted – The following activities require a land use permit
1. A nonconforming principal structure is allowed to expand horizontally up to 200 sq ft within the shoreland setback area.
 2. A nonconforming structure is allowed to expand horizontally once any part of the structure is beyond the shoreland setback area; expansion area shall be beyond setback area
 3. A nonconforming principal structure may be relocated on the property provided all of the following requirements are met:
 - a. The use of the structure has not been discontinued for a period of twelve (12) months or more.
 - b. The existing principal structure is at least thirty-five (35) feet from the ordinary high water mark.
 - c. No portion of the relocated structure is located any closer to the ordinary high-water mark than the closest point of the existing principal structure.
 - d. The county determines that no other location is available on the property to build a principal structure of the same square footage as the structure proposed for relocation that will result in compliance with the shoreland setback requirement per Section 10.5.7(E). Determination of acceptable location may include the following:
 - Soils
 - Steep Slopes
 - Setback compliance, in this order:
 1. Shoreland
 2. Roadway

1. Nonconforming accessory structures are not allowed horizontal expansion, unless the expansion is necessary to comply with state or federal requirements
- 2) For all other regulations related to nonconforming structures and uses, see Article 10.3.2

H) IMPERVIOUS SURFACE

Impervious surface standards shall apply to the construction, reconstruction, expansion, replacement or relocation of any impervious surface within 300 feet of the ordinary high-water mark of any navigable waterway.

1) CALCULATION OF IMPERVIOUS SURFACE

Percentage of impervious surface shall be calculated by dividing the surface area of existing and proposed impervious surfaces on the portion of a lot that is within three hundred (300) feet of the ordinary high-water mark (OHWM) by the total surface area of that portion of the lot that is within three hundred (300) feet of the ordinary high-water mark, and multiplied by one hundred (100).

2) IMPERVIOUS SURFACE STANDARDS

Any development within 300ft of the ordinary high water mark of a navigable waterbody is allowed permitted up to 15% impervious surface on the lot. Impervious surfaces from 15-30% on the lot are permitted, provided that mitigation is completed and a mitigation agreement is recorded in the Register of Deeds. The maximum amount of impervious surface allowed on a lot is 30%.

Mitigation options are listed in Section 10.5.7(I)

3) EXISTING IMPERVIOUS SURFACES EXCEEDING 30%

For existing impervious surfaces that were lawfully placed when constructed but exceeds 30% impervious surface the property owner may do any of the following:

- a. Maintenance and repair of all impervious surfaces;
- b. Replacement of existing impervious surfaces with similar surfaces within the existing building envelope;
- c. Relocation or modification of existing impervious surfaces with similar or different impervious surfaces, provided that the relocation or modification does not result in an increase in the percentage of impervious surface that existed on the effective date of the county shoreland ordinance, and meets the applicable setback requirements.

I) MITIGATION

The following sections of the ordinance are subject to the mitigation requirements listed here: 10.5.7(H) Impervious Surfaces. The options listed in this section shall be used to satisfy the mitigation requirements of the shoreland overlay section of the ordinance, including: Section 10.5.7(G) Nonconforming Structures and Section

10.5.7(H) Impervious Surface. All properties subject to impervious surface standards in Section 10.5.7(H) shall mitigate their properties to ensure that no additional runoff is discharged to the water body. For the purposes of this ordinance, vertical expansion and horizontal expansion count as the same additional square footage of impervious. A single option or a combination of options shall be selected by the land owner to satisfy the mitigation requirements with review by the Zoning Department to ensure the appropriate amount of mitigation is installed.

1) MITIGATION OPTIONS:

- a. Install and/or maintain a full shoreland buffer with allowed viewing corridor
- b. Removal or replacement of nonconforming structures and/or other impervious surfaces of equal or greater square footage
 1. Non-conforming structures get an additional bonus of 1.25 square feet per 1 square foot removed.
 - i) Example: A property owner needs to remove 500 sq ft of impervious surface in order to add a 500 sq ft addition to their house. If the impervious surface that the property owner wanted to remove was a non-conforming structure, then they would only need 400 sq ft to qualify.
- c. Pre equals Post Calculation:

The property owner will utilize the mitigation calculator to determine the pre development (prior to proposed improvements) and the post development (after proposed improvements) runoff ratings based on the land cover, existing impervious surfaces, and soil types. The post-development runoff amount must be less than or equal to the pre-development runoff of the lot. The difference in the two values is the amount of runoff that needs to be mitigated. Options to equalize these values may include, but are not limited to:

 1. Vegetative Plantings
 2. Rain gardens
 3. Impoundments, including but not limited to, infiltration pits and rainwater harvesting
- d. Other practices or measures that the county determines adequate to offset the impacts of the impervious surface on water quality, near shore aquatic habitat, upland wildlife habitat and natural and scenic beauty. (i.e. practices found in Wisconsin Field Office Technical Guide)

2) ADDITIONAL MITIGATION REQUIREMENTS

- a. Mitigation plans, including existing mitigation options, must be recorded by an affidavit in the Register of Deeds.
- b. Mitigation plans will have two calendar years to be installed. If mitigation options are not installed and established within two years of issuance of a permit, then citations shall be issued and a new permit could be required.
- c. For each mitigation plan, dated photo documentation of the mitigation area during and/or after the mitigation installation, as appropriate to show compliance, must be submitted as part of the application. Mitigation must be maintained and is subject to periodic compliance checks.

J) SHORELAND PROTECTION AREA

The shoreland protection (shoreland buffer) area of all lots shall conform with Admin Code NR115.05 (1)(c) vegetation. It is the strip of land 35 feet wide measured perpendicular from the ordinary high water mark.

1) ALLOWED USES (without a land use permit):

- a. Present condition can be maintained provided no additional development is proposed. In the shoreland areas more than 35 feet wide inland, removal of trees and shrubbery shall be governed by consideration of the effect on water quality and consideration of sound forestry practices and soil conservation practices.
- b. Shoreline protection activities approved by the County Land and Water Resources Department must be designed to remedy significant, existing erosion problems.
- c. Fish and wildlife habitat management projects included in a Department of Natural Resources approved management plans.
- d. Commercial timber harvest is allowed and exempt from permit requirements of Section 10.5.7(J) (Shoreland Protection Area), if one or both of the following conditions is satisfied:
 1. Such activity complies with appropriate practices specified in Wisconsin's *Forestry Best Management Practices For Water Quality* published by the Department of Natural Resources or a plan approved by the County Forest Governing Committee.
 2. Such activities are conducted on public lands and conform to Federal, State, and County management plans. Respective master plans are deemed to meet the intent of this Ordinance by established riparian protection standards through aesthetic management zones and appropriate management practices to maintain water quality and wildlife habitat.
- e. Agricultural cultivation is allowed exemption from the provisions of this Section related to the vegetation protection area and land disturbing

activities if such activity complies with Federal, State, and local laws or ordinances.

2) PERMITTED USES

- a. Viewing corridors are allowed provided they meet the following criteria:
 1. The total of viewing corridors may not be wider than 35 ft in width for every 100 ft of the lot width
 2. Viewing corridor may be split on a property but the total width of all of the corridors cannot total more than the maximum width allowed
 3. Viewing Corridors are measured perpendicular to the water on an angle and pedestrian access may meander within corridor, however they must not exceed the width of the corridor in 10.5.7(J)(2)(a)(1)
 4. Viewing corridors are allowed to run contiguously for the entire maximum width allowed.
- b. Removal of dead and diseased trees that are a safety hazard, which endanger structures, the removal of invasive species as listed in NR 40, and the removal of noxious vegetation which poses a threat to health or safety, (i.e., poison ivy).
- c. Placement of a pier, wharf, temporary boat shelter or boatlift shall be confined to waters immediately adjacent the viewing corridor described in Section 10.5.7(J)(2)(a) above unless such location is not feasible due to steep slopes, wet soils or similar limiting conditions.
- d. One developed pedestrian access including a walkway, stairway, or rail system to the shoreline may be provided if:
 1. It is located within the viewing corridor unless such location is not feasible due to steep slopes, wet soils or similar limiting conditions;
 2. It is located and constructed so as to avoid erosion;
 3. It is located and constructed so as to maintain screening of development from view from the water;
 4. It is the minimum construction necessary to provide access and includes no additional construction other than railings essential for safety;
 5. It is no more than five (5) feet wide and,
 6. It is constructed of materials that blend with the natural ground cover in the vicinity of the pathway.
- e. Fences with open construction. Does not include a privacy fence.
- f. Roadways be constructed adjacent to permitted stream crossings.

3) CONDITIONAL USES

- a. Public and private water craft constructed launching sites are authorized only by the following standards and are authorized as a Conditional Use permit provided the following are maintained:

1. Construction allowed on slopes of less than 20%;
2. There is no general public access otherwise available to the waterway;
3. Launching sites on residential property shall not be paved;
4. Access sites shall be located within the viewing corridor unless such location is not feasible due to steep slopes, wet soils or similar limiting conditions;
5. A State Chapter 30 permit shall be obtained for all construction and also be required when areas of 10,000 square feet are disturbed above the OHWM and must be obtained prior to said county application, and;
6. Vegetation removal and land disturbing activities minimized and runoff diverted or controlled so that erosion within the access corridor is avoided.

4) VEGETATION REMOVAL PENALTIES

- a. In addition to any other penalties, the penalty for removing vegetation in violation of this Ordinance shall include replacement of vegetation with native vegetation at the property owner's expense according to the following schedule:

Tree Replacement Schedule	
DBH of Existing Tree Removed	Number of Replacement Trees (2" DBH)
< 6 inches	1
Between 6 - 12 inches	2
Between 12 - 18 inches	3
Between 18 - 24 inches	4
Between 24 - 30 inches	5
Between 30 - 36 inches	6
> 36 inches	The equivalent of 2" DBH trees or greater needed per 6" DBH of the removed trees.

DBH = Diameter Breast height

K) OPEN STRUCTURES IN SHORELAND SETBACK AREA

- 1) As required by Section 59.692(1v), Wis. Stats., the construction or placement of certain structures within the shoreland setback area shall be granted special zoning permission. A permit for structures will be allowed if all of the following conditions are met:
 - a. The structure has no sides or has open or screened sides. The structure shall not be attached to any other structure unless the side of such structure at the point of attachment is open or screened;
 - b. The part of the structure that is nearest to the water is located at least 35 feet landward from the ordinary high water mark;

- c. The total floor area of all structures in the shoreland setback area on the property will not exceed 200 square feet. This calculation shall include the area of any deck, patio, the portion of any pier landward of the OHWM, and any other structure, but boathouses, walkways and stairs shall be excluded;
- d. The side yard setback shall be a minimum of 10 feet;
- e. The structure shall not exceed a height of 13 feet; and
- f. The county must approve a plan that will be implemented by the owner of the property to preserve or establish a vegetative buffer zone that covers at least 70% of the half of the shoreland setback area that is nearest to the water.

L) FILLING, GRADING, AND DITCHING

- 1) A permit is required before filling or grading of any area which is within 300 feet of the ordinary high water mark of a navigable water and which has surface drainage toward the water and on which such activities will occur:
 - a. On areas having slopes of 20% or more.
 - b. Areas of 1,000 square feet or more on slopes of 12% to 20%.
